ARM REST INSTALLATION – P5

STEP 1: (LOCATING ARM PLATE)

After upholstery, locate the arm mounting plate beneath the seat cover by feeling along the side of the back cushion.

STEP 2: (CUTTING OUT HOLES)

Locate the upper mounting hole in the arm mounting plate. Using a pair of scissors, pierce a hole through the covering material. Locate the lower mounting hole or slot, approximately 1" down from the larger hole, and pierce the covering material. Cut a small piece of fabric out of each pierced hole for screws to pass through.

STEP 3: (ATTACHING ARM)

Position the arm assembly on the arm support. Place the spring washer, then the nylon washer, over the 3-1/4" screw. Insert 3-1/4" screw into the barrel of the arm support and, **slowly, partially thread** into the arm mounting plate. **Ensure that the peg of the arm support is fully inserted in the lower slot on the arm plate**, then tighten screw as tight as possible.

STEP 4: (ADJUSTING ARM)

See arrow. Beneath the arm is a 4 position knob used to adjust the arm position.

BODY ASSEMBLY INFORMATION – P5

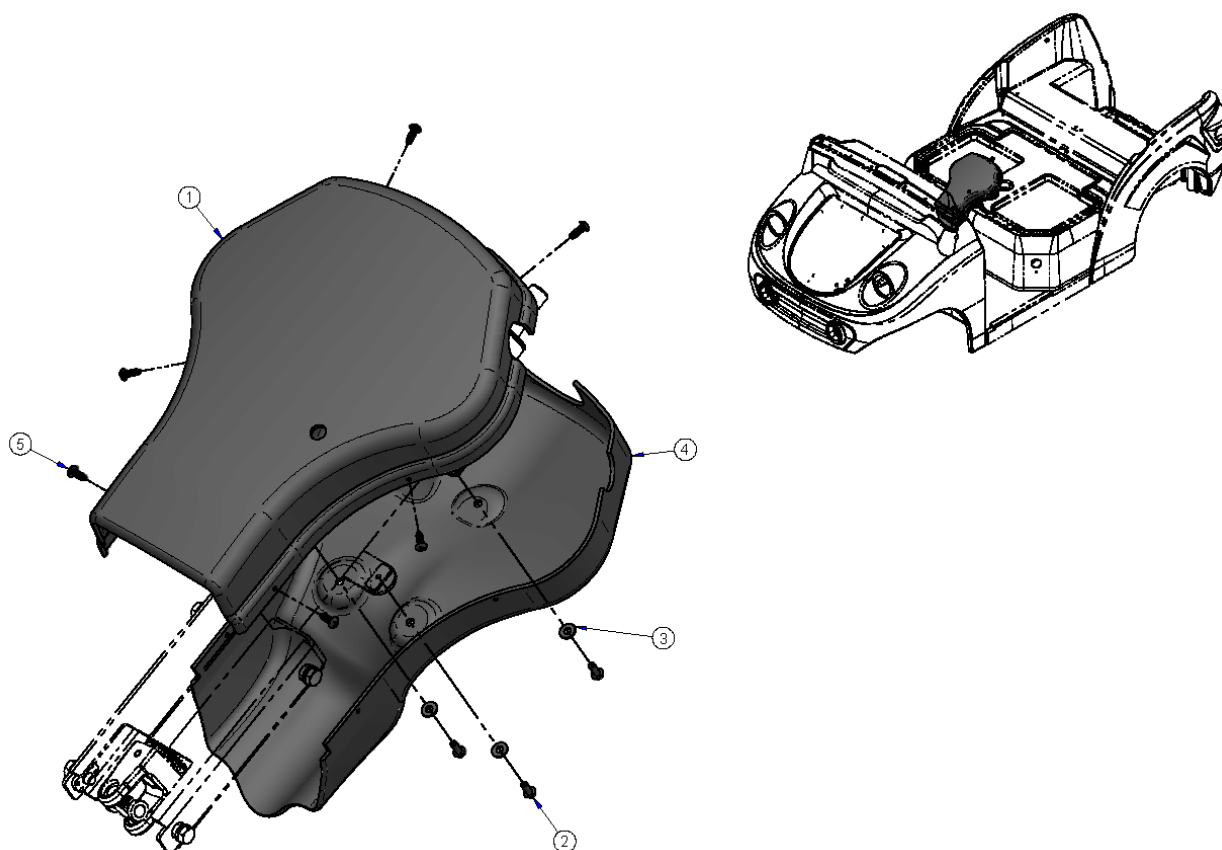

The following are used in the assembly of the P5 body parts and components.

1. 3M 94 Primer
2. Denatured Alcohol
3. Seal Bond 105
4. 3M VHB Double Face Tape

Important information

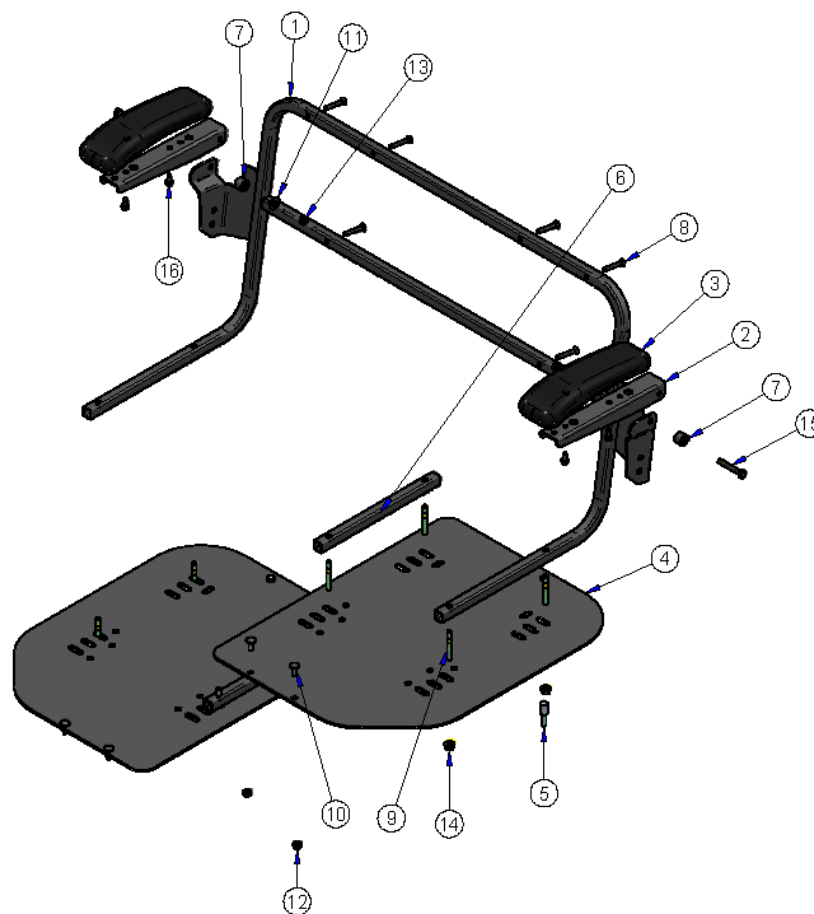

1. Use denatured alcohol to clean before applying primer.
2. To ensure adequate bonding, before applying primer, any **non-painted** surface must be lightly treated with a blow torch to remove any manufacturing process residues.
3. Treat all **painted** gluing surfaces with primer. Allow primer to become slightly tacky before applying tape or Seal Bond.
